Roxette™ Thimble Measuring Instructions

Thimble Size	Metric	Inches
XS	38 mm	1 8/16"
S	41 mm	1 10/16"
M	42 mm	1 11/16"
L	44 mm	1 12/16"
XL	47 mm	1 13/16"

To find your Roxette thimble size, you need to measure the circumference of your finger.

MEASURING

1. Wrap a narrow 1/8" strip of adhesive tape or paper around your finger at midpoint between your first knuckle and your nail.
2. Place a mark where the end rests against the wrapped strip.
3. Remove the tape or paper strip from your finger and measure its length from the end of the strip to the marked point.
4. Select the corresponding size. If your measurement is between two sizes, select the smaller size.

NOTE

Colonial Needle products are 100% guaranteed. If you find the thimble you ordered does not seem to fit properly, it may be returned. However, please contact us before returning the thimble. The Roxette thimble (as does the Roxanne thimble) has a very unique fit. By speaking with you about how the thimble feels, we may be able to help you find a better fitting size. Finally, if you find a more precise fit is needed, you may wish to try a Roxanne thimble which comes in many more sizes.
